A Communication Program Curriculum
Communication Art, Inc. Toledo, Ohio

The Dementia Populations Gift of Purpose provides a Purpose Approach that enhances memory impaired participants feelings of being useful and needed. Ideal for use with Occupational Therapists, Speech Therapists, Activity Professionals and other Health Care Professionals.

The Dementia Populations Gift of Purpose focus is on “what skills remain, not skills that are lost.” The programs contain a curriculum of brain stimulating exercises designed for dementia stages 3, 4, 5 and 6. The impact of Dementia Populations Gift of Purpose used in conjunction with the RCCT may:

- Increase brain activity and concentration
- Expand social relationships
- Rekindle personalities through reminiscence
- Relate independence through social experiences
- Boost confidence and self esteem
- Sparks memories

Behaviors that may be impacted by brain stimulating exercises:

- Risk of falling diminishes through higher levels of concentration
- Relief from depression and mood swings
- Improved sleep patterns and appetite
- Decrease loneliness

The Dementia Populations Gift of Purpose goal is to provide more enjoyable, contented days for the patient, family and care staff.

Testimonial: *“Since my wife’s involvement with the brain exercises she has less crying episodes and tantrums.” - Family Caregiver*

Call: Barbara Brock, Published Research Author, President

The Dementia Populations Gift of Purpose is based on the Communication Program’s therapeutic curriculum of brain stimulating exercises. A 6.5 hour educational workshop known as Communication Programs is available online or in the classroom for Health Care Professionals to learn how to implement the components of the Dementia Populations Gift of Purpose model. Students will also gain knowledge of the program’s evaluation process. Information and instruction on the administration of the Reality Comprehension Clock Test (RCCT) is included. This educational offering has professional contact hours and certification.
