Reducing the Use of Antipsychotics in NWO Skilled Nursing Facilities

National average of antipsychotic medication use in skilled nursing facilities is 18%.

Nearly 50% of skilled nursing facilities in NWO are over the national average.

A Problem .....with a Solution!!

An Ohio Department of Medicaid grant will provide:

Free interactive educational programming at the Hilton Garden Inn, Perrysburg, Ohio
Free assessment tools and a wide variety of support materials for your SNF community
Free Reality Comprehension Clock Test (RCCT) certification
Free 6.5 Professional Contact Hours for Nurses, OT's, Social Worker, Activity Directors
Innovative techniques tailored to the "who" of those entrusted to your care
Free ongoing facility based support throughout the project

Diana Waugh, owner of Waugh Consulting, LLC announces receipt of a grant through the Ohio Department of Medicaid to fund a three-year program to assist health professionals in skilled nursing facilities in NWO to reduce use of antipsychotic medications while increasing the use of non– pharmacological behavior management interventions.

Waugh will work in collaboration with Barbara Brock, owner of Communication Art, Inc. to provide vital assessment tools coupled with "use the next day" behavior interventions that will empower SNF staff to successfully manage resident behaviors with fewer antipsychotic medications through the use of individualized approaches.

This exciting program is built for you and your skilled nursing facility community.
